COURSE DETAILS

Dagma Inc's specialized training will help participants focus on auditing techniques in the aerospace industry.

Learn how to develop, implement, and audit internal quality systems aligned with ISO 9001:2015 and AS9100D standards.

This comprehensive course offers a cohesive understanding of auditing Aerospace Management Systems, ensuring a consistent interpretation of standard requirements.

Through careful examination, participants are equipped with the skills to become proficient auditors.

Empower your team to conduct internal audits, bolstering organizational efficiency and ensuring stringent adherence to aerospace regulations.

A reference copy will be available during the training.

YOUR INSTRUCTOR

**DAGMARA MAKARSKI,
M.A.SC., P.ENG.**

Meet Dagmara, a dedicated aerospace engineer, ready to share her deep passion for the aerospace industry with you. She'll guide you to perform your best in internal and supplier audits, all while prioritizing product safety. Expect an engaging journey with Dagmara, where she'll encourage you to think critically and discover the vast depths of knowledge waiting to be explored.

CLIENT FEEDBACK

Instructor Dagmara Makarski's deep understanding of aerospace auditing intricacies was evident in every aspect of the training. Her ability to convey complex concepts with clarity and enthusiasm truly enhanced the learning experience. As an experienced professional auditor in the field, her insights were invaluable. –Nelson, MHI Aerospace.

"Dagmara is always very interested in using her knowledge and experiences with companies to help improve and find the best way to implement a Quality System that works within the scope of the organization and meets the requirements of the various standards.

–Dave S, Dellcom Aerospace.
